Vol. 2

January - February 1933.

No. 1

This list is confined to new books on entomology and to selected periodical literature relating chiefly to economic entomology. Publications of the U. S. Department of Agriculture and of the state experiment stations, and all articles by members of the department staff, are omitted as these are listed weekly in the Official Record of the department. The contents of the Journal of Economic Entomology have been omitted because nearly all the technical workers have access to it. Periodical references to apiculture are not included.

Vol. 2

March - April 1933.

No. 2

This list is confined to new books on entomology and to selected periodical literature relating chiefly to economic entomology. Publications of the U. S. Department of Agriculture and of the state experiment stations, and all articles by members of the department staff, are omitted as these are listed weekly in the Official Record of the department. The contents of the Journal of Economic Entomology have been omitted because nearly all the technical workers have access to it. Periodical references to apiculture are not included.

No. 3

This list is confined to new books on entomology and to selected periodical literature relating chiefly to economic entomology. Publications of the U. S. Department of Agriculture and of the state experiment stations, and all articles by members of the department staff, are omitted as these are listed weekly in the Official Record of the department. The contents of the Journal of Economic Entomology have been omitted because nearly all the technical workers have access to it. Periodical references to apiculture are not included.

CURRENT LITERATURE

Selected References Compiled By The Staff Of The Bureau Of Entomology
Library From Publications Received In The Library Of The United States
Department of Agriculture, Washington, D. C.

Vol. 2

July - August 1933.

No. 4

This list is confined to new books on entomology and to selected periodical literature relating chiefly to economic entomology. Publications of the U. S. Department of Agriculture and of the state experiment stations are omitted as a printed Monthly List of Publications is issued by the Office of Information, and a mimeographed List of State Experiment Station Publications by the Office of Experiment Stations. Publications of the state extension services, and all articles by members of the department staff in outside publications, are not included as they are issued monthly in Agricultural Library Notes. The contents of the Journal of Economic Entomology have also been omitted because nearly all the technical workers have access to it. Periodical references to apiculture are not included.

ENTOMOLOGY

CURRENT LITERATURE

SELECTED REFERENCES COMPILED BY THE STAFF OF THE BUREAU OF ENTOMOLOGY
LIBRARY FROM PUBLICATIONS RECEIVED IN THE LIBRARY OF THE UNITED STATES
DEPARTMENT OF AGRICULTURE, WASHINGTON, D. C.

Vol. 2

September - October 1933.

No. 5

This list is confined to new books on entomology and to selected periodical literature relating chiefly to economic entomology. Publications of the U. S. Department of Agriculture and of the state experiment stations are omitted as a printed Monthly List of Publications is issued by the Office of Information, and a mimeographed List of State Experiment Station Publications by the Office of Experiment Stations. Publications of the state extension services, and all articles by members of the department staff in outside publications, are not included as they are issued monthly in Agricultural Library Notes. The contents of the Journal of Economic Entomology have also been omitted because nearly all the technical workers have access to it. Periodical references to apiculture are not included.

Vol. 2

November - December 1933.

No. 6

This list is confined to new books on entomology and to selected periodical literature relating chiefly to economic entomology. Publications of the U. S. Department of Agriculture and of the state experiment stations are omitted as a printed Monthly List of Publications is issued by the Office of Information, and a mimeographed List of State Experiment Station Publications by the Office of Experiment Stations. Publications of the state extension services, and all articles by members of the department staff in outside publications, are not included as they are issued monthly in Agricultural Library Notes. The contents of the Journal of Economic Entomology have also been omitted because nearly all the technical workers have access to it. Periodical references to apiculture are not included.

BOOKS

Abderhalden, E.

Handbuch der biologischen arbeitsmethoden. Abt. IX. Methoden der erforschung der leistungen des tierischen organismus, Teil 7, hft.3 (Lfg. 416) p.389-592, illus. Berlin & Wien, Urban & Schwarzenberg, 1933. Contents.- Zacher, F. Haltung und züchtung von vorratsschädlingen.

Appel, O.

Taschenatlas der gemüsekrankheiten. 24 col. pl. and a page of description with each. Berlin, Paul Parey, 1933. Lettered on cover: Pareys taschenatlanten 11.

Australia. Commonwealth. Council for scientific and industrial research. Register of agricultural research in progress in Australia. 1933. 239p. (Multigraphed). Melbourne, H. J. Green, government printer, 1933. Partial contents.- VII. Insect and other pests of plants, p.138-165.

Baeza Cuellar, H.

Estudio médico de los Culicidos hematófagos. 158p. illus. Madrid, Talleres gráficos Herrera, 1933. Bibliografía, p.155-158.

Bestimmungstabellen der euroäischen Coleopteren. Heft 111. 41p. Troppau, Ed und Reitter's nachf. Emmerich Reitter, 1932. Contents.- Zimmerman, A. Monographie der paläarktischen Dytiscidae. IV. Hydroporinae (4. teil).

Corbett, G. H., and Miller, N. C. E.

A list of insects with their parasites and predators in Malaya, compiled... from the records obtained in the Entomological laboratory 1930-1932. 15p. Kuala Lumpur, Printed at the Caxton Press, 1933. (Fed. Malay States Dept. agr. [Bul.]. Sci. ser. no.13).

Curran, C. H.

New North American Diptera. 11p. illus. New York, American museum of natural history, Nov.6, 1933. (Amer. mus. novitates no.673).

Curran, C. H.

The North American species of Anorostoma Loew (Helomyzidae; Diptera). Sp. New York, American museum of natural history, Nov.25, 1933. (Amer. mus. novitates no.676).

Deplace, E.

Manuel d'arboriculture fruitière. Preface par J. M. Guillon. 450p. illus. Paris, J. Lamarre, 1933. Partial contents.- Les ennemis des arbres fruitiers I. Les insectes, p.141-171.

Faes, H., Staehelin, M., and Bovey, P.

Les traitements effectués contre les parasites des arbres fruitiers, insectes et champignons en 1930 et 1931. 17-77p. illus. Berne, Imprimerie fédérative S. A. 1933. Tirage à part de l'Annuaire agricole de la Suisse 1933.

Federated Malay States. Department of agriculture.
